

RETINAL PHOTOS

Eyegen Vision Center is proud to offer you a better eye health screening with our non-invasive, highly sophisticated computerized instrumentation that captures a full picture of your retina in the back of your eye.

Our doctors recommend these tests to record baseline data for all patients, especially for those who are new patients or who have any of the following:

- Headaches
- Seeing Spots or Flashes of light
- History of diabetes, high blood pressure, high cholesterol, circulatory problems and tumors.
- Family history of glaucoma, diabetes, retinal detachments, cataracts, high cholesterol and high blood pressure
- Over age 18
- High eyeglasses prescriptions

These images are recommended to check the progression of any retinal changes annually in order to assist in the early detection of many disorders including:

- Glaucoma
- Retinal Disease
- Diabetic Retinopathy
- Neurological Problems (Brain tumors, Optic Nerve Disease).
- Cataracts
- Early blindness

There is an additional charge of \$39 for Digital Retinal Photos.

Please select the appropriate line and sign below:

_____ Yes, I want Digital Retinal Photos of my eyes taken.

_____ No, I do not want digital photos of my eye taken. I understand that I will be dilated and as a result may experience blurry vision for up to 4 hours.
